Krish Patel

krishpatel2136@gmail.com

Summary

Computer Science undergraduate with a strong foundation in backend development and database systems. Skilled in building scalable web applications using Django, Flask, and PostgreSQL, with hands-on experience in designing REST APIs and data-driven systems. Passionate about solving real-world problems through efficient code and continuously learning modern technologies.

Education

Bachelor of Computer Science and Engineering — Ahmedabad, India
LJ Institute Of Engineering and Technology — *Nov 2024 – Present*

Higher Secondary Education (Science) — Ahmedabad, India
New Meghdoot VidhyaVihar — *Mar 2022 – Mar 2024*

Projects

LedgerX *Django, Python, PostgreSQL, REST APIs, Cloudinary, JavaScript*

- Developed a comprehensive point-of-sale (POS) and credit management application, digitizing traditional paper ledgers for shopkeepers.
- Implemented an interactive analytics dashboard, soft-delete data archiving, and dynamic search functionality using Django and JavaScript.
- Integrated secure UPI deep-linking for automated payment collection and utilized Cloudinary for highly scalable product image hosting.

DayFlow HRMS *Flask, Python, SQLAlchemy, SQLite, JavaScript, HTML/CSS*

- Designed a comprehensive Human Resource Management System (HRMS) to automate employee attendance, leave requests, and payroll processing.
- Implemented Role-Based Access Control (RBAC) using Flask-Login to securely separate administrative dashboards from employee self-service portals.
- Engineered a robust relational database using Flask-SQLAlchemy and Alembic to handle complex associations between user profiles, daily logs, and financial records.

RevForce MotorSports *Java, JDBC, SQL, Object-Oriented-Programming (OOP)*

- Built a comprehensive console-based motorsports management system to orchestrate teams, drivers, races, and sponsorships.
- Implemented the Data Access Object (DAO) design pattern to execute complex SQL queries and ensure secure, modular database operations.
- Engineered custom data structures from scratch, including a Binary Search Tree and a Custom HashMap, to optimize in-memory data mapping and retrieval.

Technical Skills

Languages: Java, Python, JavaScript, SQL
Frameworks: Django, RestAPI, Flask, FastAPI
Data Visualization: Matplotlib, Seaborn, Plotly
Tools: Git, GitHub, Maven
Database: MySQL, PostgreSQL

Certifications

- Introduction to HTML, CSS & JavaScript – **IBM**
- Inheritance and Data Structures in Java – **University of Pennsylvania**
- Introduction to Java – **LearnQuest**
